## THE STAR 3.0 SERIES IS SUPERIOR TO NATURAL STONE AND CONCRETE SLABS

### THANKS TO:

#### ► GREATER STRENGTH

Thanks to its glazed surface, gres has a high strength and low abrasion resistance.

#### ► RESISTANCE TO STAINING AND EASY CLEANING

To remove current dirt, simply use water and a brush. Impregnation is not necessary. Even grease or wine stains are not a problem when cleaning the slabs!

#### ► R11 RESISTANCE TO SLIPPING

Excellent slipping resistance properties that guarantee safety for all users.

#### ► RESISTANCE TO ATMOSPHERIC CONDITIONS

Excellent resistance to atmospheric conditions, including frost or solar radiation.

### WHY 3 CM?

The innovative **thickness** of the **STAR 3.0** series slabs amounting to **3 cm** guarantees a number of advantages. First of all, **50% higher weight means 50% more stability!**

#### ► RESISTANCE TO STAINS

The surface of gres slabs is resistant to mold, moss and chemicals.

#### ► DURABILITY AND STRENGTH

Breaking force higher than for 2 cm tiles. The 3 cm thick terrace tiles can also be used on driveways and high traffic areas.

#### ► WE ARE INSPIRED BY NATURE

Nature's creations were our inspiration when creating patterns for our terrace slabs collections.

The uniqueness of natural stones, the warmth of wood and the austerity of concrete are the keystones of the Star 3.0 series.

All of our products reproduce the characteristic features of natural stones and wood, so that they perfectly harmonize with these elements.
